

0.9 CF MINI BLASTER

Small and portable, suitable for blasting needs on the go

**0.9 CF Mini Blaster
(Pressure Hold)**

Despite its size, the Schmidt® Mini Blaster is a portable blaster with the same features as standard Schmidt pressure-hold blasters. Already boasting the industry's lowest pressure drop, Schmidt® blast pots keep improving with quality-of-life upgrades and substantial feature improvements.

The Mini Blaster is a pressure hold system that retains pressure when the deadman control is released, which reduces abrasive loss during start-up and shutdown, ending up with an overall faster response time. They are now equipped with the TeraValve™, which makes the system lighter and enhances its durability via Schmidt® XL Technology. Providing excellent value for contractors and industrial users ensures they maximize their productivity and efficiency to maximize profit, especially when working with expensive media.

FEATURES

- 150 psi (8.6 bar) system includes wheels and single pipe handle
- 3/4" Piping
- Pneumatic or Electric controls
- Auto Air Valve
- The Pop-up has to be manually closed by pulling up on a chain before pressurizing the vessel
- Drop-in screen (3/32" mesh) and TeraValve™ XL™ reduces overall weight and improves durability via Schmidt® XL Technology
- 25' Blast hose assembly and 1/8" Ceramic Nozzle for use in applications where minimally compressed air volume is available

SPECIFICATIONS

Vessel size: 0.9 cu. ft.

L = 16 5/8" x W = 16 1/2" x H = 37 3/8" (72 lbs)
