

BAABS BLAST LIGHT

Blast Light for BAABS

BAABS Blast Light w/ tear-off lens

Compact BAABS Assembly w/ Pneumatic G3 Trigger Deadman & Blast Light

The BAABS Blast Light is designed to be mounted onto the front of a BAABS rail to illuminate surfaces to be blasted. This accessory improves visibility in dark or dusty conditions, promoting more thorough blasting and improved productivity. Mounting the light onto the BAABS rails enables the illumination pattern to track the blast pattern. When installed next to the nozzle holder, the BAABS rail base keeps the blast hose, nozzle, and blast light aligned. In addition, the swivel feature of the rail allows the blast light to remain fixed by negating the naturally occurring blast hose twist that often causes tie-wrapped lights and deadman to shift during blasting. Sacrificial quick tear-off lenses assure optimum illumination during blasting.

FEATURES

- Tear-off lenses prevent more expensive glass lenses from frosting. When one tear-off lens is frosted, simply tear off the old lens to expose a fresh clear lens.
- Tear-off lenses are sold in packs of 5.
- All lenses can be replaced without tools.
- Each tear-off lens has a different length tab to allow quick and easy removal.
- Quickly mounts directly onto any BAABS rail base.
- Field serviceable.
- Compact and lightweight design.
- 12-24VDC
- 1/2 amp at 12 volts

SPECIFICATIONS

- L = 4.5" x W = 2.5" x H = 3.5"
- Weight = 13.3 oz
